

Button up data and bring the cloud back home

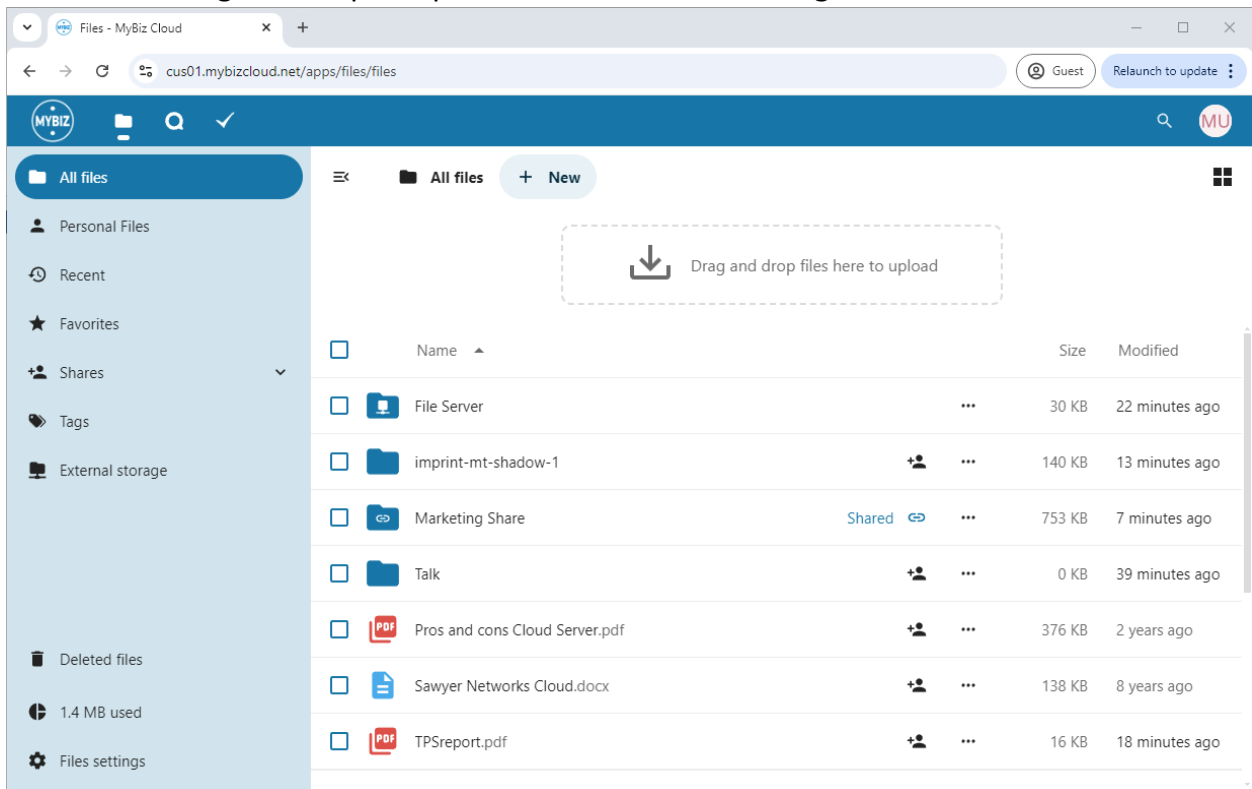

Traditional public clouds are vulnerable to data breaches. Whereas, MyBiz cloud is an on-premise private file sharing, and collaboration cloud platform. It can easily be deployed to your own network infrastructure.

Key Features:

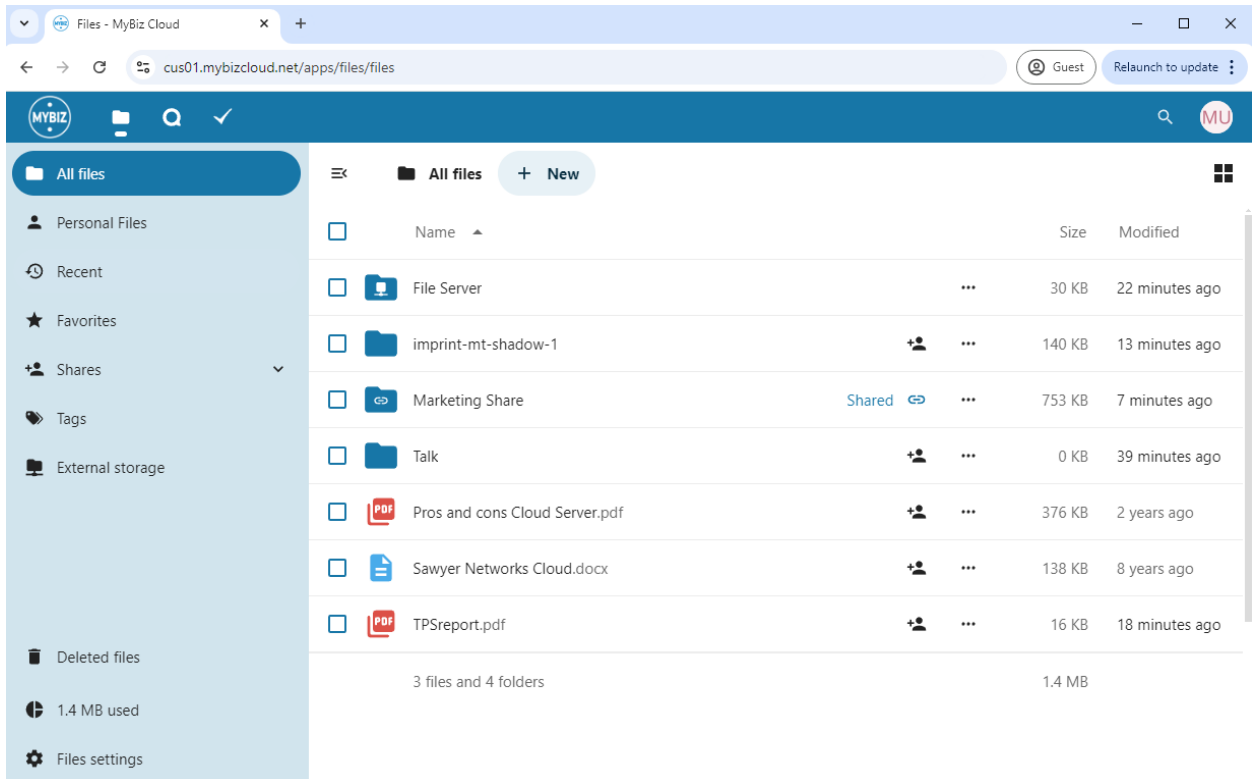

- Securely access your company's data from anywhere
- User-friendly sharing and collaboration
- Includes a Zero Trust SHA-256 SSL certificate
- Secure behind your own network firewall
- Data mining resistant
- Email links for large files
- Supports editing of Microsoft Office files
- Chat and video conferencing

Drag and drop to upload and download files right from a browser.

MyBiz can be configured to access your existing file server.

Create and edit Microsoft Office files on the fly.
